Finesse Fishing Began Here

VOLUME 4, ISSUE 4, 2016

A NOTE FROM CHARLIE

Charlie Brewer, Jr.

Slider Lures and guests attended the 2016 Garry Mason's Legends of the Outdoors awards in August.

Lady bass pro Lucy Mize was inducted from the fishing category. Lucy fished professionally for 25 years on the Bass-N-Gal, B.A.S.S., WBT, Everstarts, and Redman tournament circuits. She even fished with her husband, Jimmy, on a team circuit.

Founder Garry Mason announced the re-naming of The Davy Crockett Trailblazer Award to the Ray Scott American Trailblazer Award in recognition of Hall of Fame Member and the Father of Professional Bass Fishing, Ray Scott.

Other fishing related recognitions were Lisa M. Snuggs, American Outdoor Sportsman of the Year, FLW Fishing League Worldwide, Outdoor Organization of the Year and Flambeau Outdoors, Outdoor Manufacturing Excellence Award for both Fishing and Hunting.

Many notable outdoor personalities are usually in attendance at the event providing a rich representation of outdoor sports.

Falling for crappie

This time of year many fishermen are getting their crappie fishing gear ready.

The water is beginning a subtle decline in temperatures, cooler days mixed in with warmer weather and leaves on the ground- Fall is in the air.

Whether a pro crappie tournament angler or just enjoy a day on the water chasing those "paper mouths"

Slider Lures has a huge arsenal of crappie-specific plastic lures and Slider heads to choose from.

Fishermen can choose their "weapon" from the array of Slider lures available including: the 1" Crappie/PanFish Grub; a 1 1/2" Crappie/Panfish Grub; 2 1/8" Slider Minnow/Grub; 2" Curly/Crazy Tail Grub; a 2" Twin Tail Grub; the Charlie Bee Grub with blade; a Crappie Slider Weedless grub; Spin Jig; and the Whirly Bee;

Our crappie lures effectiveness has been proven on the water time and again.

The large array of color choices Slider produces is only one advantage

offered. The fairly new crappie Double Light Wire crappie Slider head makes getting lures back from a hang-up much easier. The

light wire hook straightens when pressure is applied and is easily bent back into shape after being retrieved. However, the hook is strong enough to hold a fish without straightening so crappie anglers have the best of two worlds- the hook is easily removed from limbs, etc. and the

thin wire penetrates the mouth of the fish quickly.

Light line, a Slider crappie lure and a Double Light Wire Crappie Slider is always a recipe for putting slab crappie in the frying pan.

Slider sponsored Shoals Youth Bassmasters fish Pickwick to end 2016 season

Slider Lures is proud to be one of the sponsors of the Shoals Youth Bassmasters in northwest Alabama.

The club ended their 2016 tournament season with their event on Pickwick Lake. Sixty of the youth club members participated in the tournament finale. A festive picnic, fishing product prizes and annual awards added to attraction of the tournament for the youth club members.

Richard Laxson (rk laxson@hiwaay.net) noted, director of the Shoals Youth Bassmasters said, "These kids show up tournament after tournament regardless of wind, rain or heat."

The youth competition is divided

into three club age groups.

The young men and women stayed on the water until the last minute trying to catch a bass to help their five fish limit weight fishing through the hot sunshine.

The Shoals Youth Bassmasters is the oldest, active Bassmaster Youth club in the country. The club also has the largest Bassmaster Youth club membership in the United States.

Slider Lures is happy to contribute to youth fishing development. Our finesse lures are perfect for new bass anglers.

Three of the younger Slider anglers are shown on the left.

Suspending Bass PART TWO

"IN HIS OWN WORDS" - The Late CHARLIE BREWER, SR.

When I started fishing lakes I would fish according to the graph recorder. Seldom did I catch fish any deeper than the graph showed. This proves that fish do suspend and we should fish accordingly.

A small, 200 acre lake in Tennessee was a flat land-type lake and the fishing was done on the hot, bright days of July and August.

Over a period of one month, my buddy and I fished this lake several afternoons. By actual count, we landed 323 bass averaging about 46 bass per afternoon. These were head counts and they ran from very small up to about six lbs. each.

Many of them were nice 3 pounders and super fun on our light tackle.

On every afternoon we visited the lake we observed the bass to be suspended no more than four or five feet deep according to our graph recorder and/or oxygen meter. Four or five feet was the exact depth we caught the fish. We were using the Slider rig.

The Slider head was trimmed down so we could apply the slow, steady "do nothing" retrieve. At those shallow depths we tried to slide our lure through the water no deeper than four or five feet deep. As a result, we were in action fast and furious. Nearly all of the fish were taken way offshore of the small lake.
