

DECATUR UTILITIES SANITARY WASTEWATER OVERFLOWS

February 19 – February 26, 2019

SSO Information

NPDES Permit No. AL0048593

Reported By: Decatur Utilities/Decatur Utilities WWTP

Report Revision

Location of SSO: Can be viewed on the [ADEM SSO Map](#) if the SSO ended less than 10 days ago

Latitude: 34.553581

Longitude: -86.967667

Location: Manhole #4698 located at 1401 Plaza St. SE

Receiving Stream: Flint Creek; Drainage Ditch

Date SSO Began: 02/20/2019 09:25 AM

Date SSO Ended: Updated

Estimated Volume (in gallons): **46790**

SSO Information

NPDES Permit No. AL0048593

Reported By: Decatur Utilities/Decatur Utilities WWTP

Receiving Stream: Tennessee River (Wheeler Lake); Storm Drain; Drainage Ditch

Date SSO Began: 02/22/2019 04:00 PM

Date SSO Ended: 02/22/2019 08:46 PM

Estimated Volume (in gallons): >= 10,000 < 25,000 gal

SSO Information

NPDES Permit No. AL0048593

Reported By: Decatur Utilities/Decatur Utilities WWTP

Report Revision

Location of SSO: Can be viewed on the [ADEM SSO Map](#) if the SSO ended less than 10 days ago

Latitude: 34.608117

Longitude: -86.990694

Location: Junction Box located at 2 W Moulton St. SE

Receiving Stream: Bakers Creek; Drainage Ditch

Date SSO Began: 02/22/2019 02:00 PM

Date SSO Ended: 02/24/2019 12:37 PM

Estimated Volume (in gallons): >= 25,000 < 50,000 gal

SSO Information

NPDES Permit No. AL0048593

Reported By: Decatur Utilities/Decatur Utilities WWTP

Report Revision

Location of SSO: Can be viewed on the [ADEM SSO Map](#) if the SSO ended less than 10 days ago

Latitude: 34.585009

Longitude: -86.956094

Location: Manhole #2974 located at 2119 Harrison St. SE

Receiving Stream: Tennessee River (Wheeler Lake); Storm Drain; Drainage Ditch

Date SSO Began: 02/22/2019 11:50 AM

Date SSO Ended: 02/25/2019 10:21 AM

Estimated Volume (in gallons): >= 25,000 < 50,000 gal

TOTAL: Forty-Six (46) SOS Reports indicating from 2,546,370 gallons to \$16,546,370 gallons of Sanitary Sewer overflows from February 19 – February 26, 2019. Many of these dump into Flint Creek above Point Mallard Park and our Decatur water intake facility. Others pollute/contaminate the Tennessee River direct.

A review of the Receiving Steam – drainage/discharge points indicates that a number of these may be being reported incorrectly, including affluent from Sanitary Sewer overflows draining into Wilson Morgan Park Lake in violation of Corp. of Engineers regulations. Also a number of the overflow points indicate the Receiving Stream to be “Baker’s Creek” when review indicates the receiving stream to be “Dry Creek” or other overflow discharge points. See Attached Summary of SOS Reports by Decatur Utilities to ADEM.
